I am an Information Technology graduate from Del Institute of Technology with a strong interest and background in Software Quality Assurance and Software Testing. During my previous internship, I gained hands-on experience in testing system functionality and logic, identifying and documenting bugs, and performing application checks to ensure systems function correctly and meet requirements. I have strong attention to detail, analytical thinking, and problem-solving skills, combined with a proactive attitude and a strong willingness to learn. I am eager to contribute to a Quality Assurance or Software Testing team by helping deliver reliable, high-quality, and user-friendly applications.

EDUCATION

Institut Teknologi Del

Toba, Sumatera Utara, Indonesia

Associate Degree (D3) in Information Technology, GPA 3.39/4.00

Sep 2023 – Sep 2026 (Expected)

- Relevant coursework: Software Testing, Web Development, Database Systems, and Artificial Intelligence
- Developed foundational knowledge in software testing, system analysis, database management, and application development
- Actively participated in student organizations and committees, strengthening teamwork, leadership, communication, and cross-functional collaboration skills

EXPERIENCE

Dinas Komunikasi dan Informatika

Tapanuli Utara, Sumatera Utara, Indonesia

Web Developer Intern

Feb 2026 – Aug 2026

- Developed and maintained a web-based monitoring application using Laravel and PHP, implementing features based on functional and business requirements
- Designed and implemented CRUD functionality, data management, user roles, and application workflows, integrating the application with a relational database
- Performed functional testing and debugging during development to identify system errors, validate features, and ensure application functionality worked as expected
- Collaborated with internal teams to analyze requirements, troubleshoot issues, and improve the functionality, reliability, and usability of the application

Apple Developer Academy @ Infinite Learning

Batam, Riau, Indonesia

iOS Developer

Jun 2025 – Jul 2025

- Collaborated with a 7-member development team in a one-month sprint to design and develop an iOS application prototype using SwiftUI within a Challenge-Based Learning framework
- Developed core UI components and application features, contributing to a functional end-to-end prototype delivered within the project timeline
- Participated in team discussions, feature planning, implementation, and iterative development throughout the project to ensure alignment with project requirements

PROJECTS

Development of the Tapanuli Utara Regency Regional Government Activity Monitoring Information System

Mar 2026 – Aug 2026

- Served as Web Developer & QA, developing a Laravel-based monitoring platform with activity management, budget monitoring, procurement, reporting, and role-based access control, while conducting functional, integration, and UI testing and validating PostgreSQL database operations and Excel/CSV data imports

**Academic Document Management Information System Development (Case Study:
Bachelor of Engineering Aug 2025 – Jan 2026 Management Study Program)**

Aug 2025 – Jan 2026

- Served as System Analyst & Quality Assurance, analyzing requirements and system workflows, defining functional specifications, and designing test cases, followed by functional, integration, and UI testing to validate system reliability, data accuracy, and usability

MANJARA – Toba Event Finder (Figma)

Sep 2025 – Nov 2025

- Served as UI/UX Designer, designing a web-based event discovery and ticketing platform that enables users to discover, sell, and purchase tickets for events across the Toba region, ranging from government and international events to local community activities
- Designed user flows, wireframes, and high-fidelity prototypes for event discovery, ticket purchasing, and event management, focusing on intuitive navigation and a seamless user experience

CalorieTrackerApp (CALORIZZ)

Jun 2025 – Jul 2025

- Served as System Analyst & iOS Developer, defining application features and workflows and conducting literature reviews on calorie estimation and nutritional metrics, while contributing to photo-based food identification to estimate calorie content, real-time activity tracking, and UI development using SwiftUI

**Schedule and Task Management Application for SMA Negeri 1 Girsang Sipangan
Bolon**

Feb 2025 - Jun 2025

- Served as System Analyst & Quality Assurance, analyzing requirements, user flows, and workflows for students and teachers, while defining system functionality and conducting functional and UI testing to validate features, report defects, and ensure a stable and reliable release

Redesign Rumah Kreatif Toba (Figma)

Apr 2025

- Conducted **heuristic evaluation, competitive analysis, and System Usability Scale (SUS) testing** to identify UX issues and redesign the platform, targeting improvement from a baseline SUS score of **58.75**, and validated the proposed design through usability testing with **10 respondents**

Delshop Flutter App

Nov 2024 – Dec 2024

- Served as System Analyst, UI/UX Designer & Quality Assurance, analyzing business requirements and user workflows, developing wireframes and prototypes, and collaborating with a six-member team to implement and validate user-centered features, navigation, and interface consistency

Data Information Processing Website for HKBP Peanajagar Church

Feb 2024 – Jul 2024

- Served as System Analyst & Quality Assurance, analyzing system requirements and user workflows, designing wireframes and system flows, and conducting functional and UI testing while documenting and validating defects with a four-member development team to improve system stability and usability

Static Website for Rumah Makan Menara

Nov 2023 – Dec 2023

- Served as System Analyst & UI/UX Designer, analyzing customer and business workflows for an online ordering system, designing intuitive navigation and responsive interfaces, and performing functional and UI testing to validate usability and ordering efficiency

LEADERSHIP & ACTIVITIES

Information Technology Student Association - Documentation Division Member

Dec 2025 – Aug 2026

- Managed event documentation and visual content production for the Information Technology Student Association, creating photo and video assets for organizational publications and promotional activities
- Collaborated with an 8-member documentation team to maintain consistent visual content and branding across social media and campus communication channels

- Supported safety monitoring and first aid operations during the Cadre Program for 54 new IT students, including physical activity monitoring, risk prevention, and medical readiness
- Prepared and inspected first aid supplies and collaborated with 4 committee members to ensure a safe, organized, and responsive event environment

- Produced and managed photo and video documentation for student association events, supporting publication needs and audience engagement across social media and campus platforms
- Coordinated with an 8-member team to deliver visual materials on schedule and maintain consistent visual communication for organizational activities

- Supported first aid and emergency response operations during the Cadre Program, providing safety monitoring and rapid assistance throughout activities involving 59 participants
- Conducted safety inspections, prepared medical supplies, and collaborated with 4 committee members to manage potential emergencies and maintain participant safety

SKILL

Tech Stack	: HTML/CSS/JavaScript, PHP/Laravel, React.js, Next.js, Python, FastAPI, SwiftUI, Flutter/Dart, MySQL, PostgreSQL
Software Testing	: Manual Testing, Functional Testing, Integration Testing, UI Testing, Regression Testing, Data Integrity Testing, Bug Identification & Reporting, Test Case Design
Business Analysis	: Agile (Scrum), Waterfall; UML, Use Case Analysis, Requirements Analysis, Business Process Modeling (BPMN), User Flow Analysis, System Requirements Specification (SRS), Draw.io
UI/UX Design	: Figma, Wireframing, Prototyping, User Flow Design, Usability Testing, Heuristic Evaluation, Competitive Analysis, System Usability Scale (SUS)
Development & Database	: Laravel, PHP, REST API, MySQL, PostgreSQL, Excel/CSV Data Processing
Tools & Collaboration	: Git, GitHub, Postman, Trello, Microsoft Office
Soft Skills	: Analytical Thinking, Critical Thinking, Problem Solving, Attention to Detail, Communication, Teamwork, Adaptability, Willingness to Learn
Certification	: Postman API Fundamentals Student Expert UI/UX Design Fundamentals - MySkill Short Class
